
ARMANDO SANTOS

When you think of Armando Santos creation, you think of intricate details and flawless cut!

This Oslo based designer is not only a fashion designer but a textile artist as well.

He was born in the Philippines then moved to Bergen, Norway, in an early age. Now residing in his elegant flat in Oslo where he continues to create his masterpieces.

Armando Santos has achievements such as The Smirnoff International Fashion Award and has earned a well deserving fame for his unconventional designing and tailoring techniques.

He is best known for using recycled jeans and turning them in to sophisticated haute couture garments.

His creations these past few years were artfully inspired by origami. The "Nordlys" or aurora borealis Autumn / Winter collection he presented during the Oslo Fashion Week in 2011 captured attention for its quintessence of colour tones and materials; delicate and dreamy dresses ... totally northern delights ...

His ingenuity continues to captivate us and the S.I.N. Society is honoured to present his latest collection in our show this year.
